

### From Craig's Desk .....

Thank you for all the positive feedback and great comments we received from our first newsletter. It is hard to believe that it is now December and nearly Christmas already. For those of you who don't know we have moved workshops again and all our team is enjoying having a bigger space to work in (and the much nicer office space). Although this has been an unexpected move for us we are confident and happy now we have made it. It is funny that before we moved in the space seemed so huge and that we were hesitant about making the move again, but it certainly hasn't taken long to fill up the space.

With all the recent attention given to the American Financial Crisis, coupled with the impact which our Elections always seem to have on our economy it would be easy (and safe) to sit back and consolidate at this time. However, I try to always remember the saying

"If you can dream it, You can do it!"

However, how many of us really believe that and don't let ourselves get bogged down with the day to day drudgery and economic forecast? Maybe it is worth changing your perspective and asking yourself how different would your life be if you really believed that. I am making it my conscious decision to change my focus and 'not to sweat the small stuff' and I am looking forward to great things coming up ahead. Will you join me? CRAIG

*We would to take this chance  
to thank all our customers  
for their support this year.*

*Best Wishes to you & your families  
for a Happy & Safe Xmas Holiday.*

*We will close 12noon Tue 23 Dec  
& re open 7.30am Mon 5th Jan.*

*For any urgent or breakdown work  
during this time please call Craig.*

## Recent Jobs

Over the last 3 months we have been working alongside Robertson Boats in Warkworth on a 38foot Aluminium Ramco Boat.

Extensive alterations were made to both the inside and outside of the cabin area, including full framing of a new floor area, seat and storage units and a wet locker. Fabrication and welding was done with care to match existing lines and contours of the boat.

A feature of the boat was a Fish Processing Station with internal sinks, rubbish bin and BBQ storage locker fitted. This itself provided some challenging fabrication processes. This unit also became a structural part of the boat, supporting the roof.

We have enjoyed working alongside John and the team at Robertsons and would like to thank Conrad at Robertson Boats for choosing Onsite Engineering to work with them to complete this job.

MIKE

## We have moved!

Yes we have been on the move again, but not too far ..... We are now at

UNIT 16

30 Hudson Road, Warkworth

(Same complex again....just next door)

The old 'Wavecrusher' building.

All other details remain the same and we

now have nice offices and

a HUGE workshop space.

CALL IN AND SEE OUR NEW SPACE

SOMETIME

Thank you to our suppliers, please support them .....
